# Why should you learn Japanese?

---

1. Japan is the third largest economy in the world and the Japanese language is the ninth most spoken language in the world, with 128 million people speaking it as their first language. Knowledge of Japanese could be an asset in many ways and it can boost your professional value.
  2. The number of Japanese speakers in India is quite limited, since the majority of people in India who learn a foreign language choose European languages like German, French and Spanish. Thus, there is less competition for positions with Japanese-speaking applicants and choosing a less commonly taught language will pop out on your CV and differentiate you from the crowd.
  3. Knowledge of Japanese provides you access to advanced technology. Japan is considered as one of the most innovative and creative nations in the world. Japan has the highest number of Nobel Prize winners in Asia and Japan is one of the famous study abroad destinations for Indian students.
